PROFILE

AI Systems Engineer with a Master of Data Science and BSc in Computer Science. Experienced in translating business requirements into AI workflows, integrated systems, and digital products, with ownership across solution design, implementation, and validation. Building Mouja.ai 🌐 for Saudi e-commerce, balancing architecture, reliability, and cost.

WORK EXPERIENCE

AI Systems Engineer <i>Human Managed</i> - Clarified business requirements, operational needs, risks, and delivery priorities with stakeholders. - Designed backend services, REST APIs, and retrieval workflows connecting AI with business systems. - Evaluated solution options and explained architecture and delivery tradeoffs to stakeholders. - Supported production readiness through validation, observability, documentation, and issue tracking.	10/2024 – 01/2025 Remote - Singapore
--	---

PROJECTS

Mouja.ai — AI Growth Intelligence for Saudi E-commerce 🌐 - Started and built a bilingual AI platform for Saudi merchants, integrating business profiling, market research, recommendations, and video generation. - Redesigned profiling with Gemini URL Context, reducing latency by 74% in initial benchmarks and projected inference cost by 64%. - Modularized 25 oversized files into 316 focused units, adding agent guidance and architectural checks; reduced targeted verification time by 58% (225→94 seconds). - Engineered validated pipeline handoffs, source citations, human approval gates, and recoverable workflows.	07/2026 – Present
LearnShift.io – AI-Enabled Learning Platform 🌐 Built LearnShift.io 🌐 after operating Hackergee, an online course that attracted 3,500+ registrations; used learner progress and content state to design personalized learning journeys.	07/2025 – Present

EDUCATION

Master of Data Science (Professional) <i>Deakin University</i> GPA equivalent: 3.75/4.00	09/2025 Melbourne, Australia
BSc Computer Science <i>University of Victoria</i>	05/2019 Victoria, Canada

SKILLS

Solution Engineering & Delivery: Requirements Analysis, Solution Design, Systems Integration, Stakeholder Collaboration, Process Analysis, Project Coordination

AI & Data Systems: AI Workflow Design, LLM Applications, RAG, Agentic AI, Data Analysis, Python

Architecture & Reliability: REST APIs, Cloud Architecture, Authentication, Data Validation, Observability, Automated Testing

CERTIFICATIONS

Azure AI Fundamentals (AI-900) | Certified Risk Management Officer (CRMO) |
Artificial Intelligence Governance Professional (AIGP) — In Progress | Azure AI-103 — In Progress

PROFESSIONAL TRAINING

Modern Software Engineering & AI Systems Bootcamp <i>Tuwaiq Academy</i>	07/2026 – 09/2026
Full-Stack Web Development Bootcamp <i>Coding Dojo</i>	

LANGUAGES

Arabic Native	English Professional proficiency (IELTS Academic 6.5)
