PROFILE

AI Systems Engineer with experience translating business requirements into production-ready digital and AI solutions. Skilled in solution engineering, requirements analysis, API integration, AI workflows, and cloud-native systems. Experienced working across technical and business needs to design scalable, reliable solutions, and currently building Mouja.ai [↗](#), an AI-native growth intelligence platform for Saudi e-commerce.

WORK EXPERIENCE

AI Systems Engineer <i>Human Managed</i>	10/2024 – 01/2025 Remote - Singapore
- Translated business and IT requirements into production-ready AI solutions with stakeholders. - Designed backend services and digital workflows integrating AI capabilities with business systems. - Designed REST APIs and retrieval solutions integrating internal and external services. - Improved solution reliability through validation, observability, structured logging, and traceability. - Supported scalable implementation of AI-enabled workflows from requirements through production.	

EDUCATION

Master of Data Science (Professional) <i>Deakin University</i> GPA equivalent: 3.75/4.00	09/2025 Melbourne, Australia
BSc Computer Science <i>University of Victoria</i>	Victoria, Canada

CERTIFICATIONS

Azure AI Fundamentals (AI-900) | Certified Risk Management Officer (CRMO)

PROJECTS

Mouja.ai — AI Growth Intelligence for Saudi E-commerce ↗	07/2026 – Present
- Designed an AI-native platform translating Saudi merchant data into actionable growth and marketing intelligence. - Engineered a multi-agent workflow for merchant profiling and Saudi market opportunity analysis. - Designed secure Salla ingestion and API workflows with validation, authentication, and failure controls. - Validated the platform through 799 unit tests and live Arabic staging workflows.	
LearnShift.io – AI-Enabled Learning Platform ↗	07/2025 – Present
- Built LearnShift.io ↗ after operating Hackergee, whose online course attracted 3,500+ registrations. - Designed personalized digital experiences using learner progress, content state, and contextual retrieval. - Developed backend services and APIs supporting AI-powered learning workflows.	

SKILLS

Digital Solutions & Solution Engineering — Requirements Analysis, Solution Design, Digital Transformation, Stakeholder Collaboration, Process Analysis, API Integration
AI & Data Solutions — Agentic AI, LLM Applications, RAG, Embeddings, AI Workflow Design, Data-Driven Solutions
Technical Engineering — Python, REST APIs, Cloud Architecture, Authentication, Observability, Validation, Distributed Systems
Productivity — Microsoft Office, PowerPoint, Excel, Word

PROFESSIONAL TRAINING

Modern Software Engineering & AI Systems Bootcamp <i>Tuwaiq Academy (Expected completion: 09/2026)</i>	07/2026 – Present
Full-Stack Web Development Bootcamp <i>Coding Dojo</i>	
AWS Solutions Architect – Associate Exam Preparation (In Progress)	

LANGUAGES

Arabic Native	English Professional proficiency (IELTS Academic 6.5)
